The Ministry of Communication and Information Technology of the Islamic Republic of Afghanistan has informed of the following in reference to operative paragraph three of the Resolution 71/28 entitled, "Development in the field of information and telecommunication in the context of international security":

Achievements:

1. The Ministry of Communication and Information Technology of the Islamic Republic of Afghanistan, to promote international security of IT and the authenticity of electronic transactions, has established the PKI device. The Ministry has also created the NOC System and intends to connect this system with the system of the member states for identification and verification purposes of the ongoing statistics and data flow on the internet.

2. The Ministry has drafted cybercrime laws and has sent to the Ministry of Justice for consideration. For fundamental solutions, in light of these laws, more secure electronic deals can be made and cybercrimes can be prevented.

3. The Ministry has created a National Cyber Strategy, and for exchange of secure information and to establish an information technology security framework for NIXA project will be implemented by the Ministry. And in order to address and identify also the cybercrime project will be utilized.

Proposals:

1. The Ministry of Communication and Information Technology of the Islamic Republic of Afghanistan requests the developed countries that have cyber police, to assist and cooperate with the Ministry in the establishment of the cyber police.

2. To address cybercrimes and to fight seriously against this phenomenon a coherent system (conducive for criminal information) be established at the international level.

3. One of the important solutions for the security of internet is to establish internet governance. Through the internet governance, basis can be provided for the exchange of confidential information and data between all departments and offices of the government for the implementation of the

above network. The Ministry requests in this regard the cooperation of all the member states with Afghanistan.

4. The Ministry also requests the Member States to support the staff of the Ministry to fight cybercrime and improve information security, by providing them vocational and technical training programs.
